

TABLE OF CONTENTS

Appendix H: Details on Results of Model Simulations	H-1
Urban and Agricultural Water Supply Performance Measures Base Cases and Alternatives	H-3
Urban and Agricultural Water Supply Performance Measures Incremental Simulations	H-103
Urban and Agricultural Water Supply Performance Measures 2005 Supply-Side Management Scenario.....	H-173
Natural Systems Performance Measures Base Cases and Alternatives	H-191
Natural Systems Performance Measures Incremental Simulations	H-309
Natural Systems Performance Measures 2005 Supply-Side Management Scenerio	H-427
Appendix I: Other Related Documents	I-1
Proposed Methodology for Defining and Assessing the 1-in-10 Year Level of Certainty for the Lower East Coast Planning Area	I-3
Background	I-3
Modeling Tools to be Used in the Analysis.....	I-5
Proposed Technical Evaluation of the 1-in-10 Year Level of Certainty	I-6
1-in-10 year Level of Certainty Performance Measures.....	I-9
Disclaimers	I-10
Regulatory Analysis.....	I-10
References.....	I-11
Primary Water Budget Components Derived from Incremental Simulations of the SFWMM	I-13
Assessment of Caloosahatchee Design Elements in The Restudy and LEC Plan Using Revised Caloosahatchee Hydrology	I-25
Summary	I-25
Background	I-25
Problem Statement	I-27
Methodology	I-28
Assessments	I-31
Conclusions and Recommendations	I-39

**Appendix J: Minimum Flows and Levels Recovery and Prevention
Strategy** **J-1**

Overview.....	J-3
MFLs Prevention Strategy through Water Shortage Plan Implementation	J-7
MFLs for Specific Water Bodies	J-7
MFLs Recovery and Prevention Strategies for Specific Water Bodies.....	J-10
MFLs Recommendations	J-18
References.....	J-25
